ENGINEERING THROUGH MUSIC

ORLA MURPHY

Engineering Quality Transformation Manager at Jaguar Land Rover

“Growing up, engineering wasn’t even on my radar, but I loved maths, physics and music. I couldn’t decide what I wanted to be. It wasn’t until the discovery of an engineering course that was a third maths, a third physics and a third music that I had that eureka moment of ‘that’s what I want to do with my life’ – and I’ve never looked back. Engineering is so diverse and varied, and I’m thrilled to support Engineers Week 2019 as an Engineering Superhero Ambassador and I look forward to inspiring students to explore the limitless opportunities a career in the area offers.”

I really enjoy solving problems, and I like the fact that my job is constantly evolving with new technology. Engineers have to adapt and use cutting-edge technology, so your role is always changing and developing. I can’t imagine a career doing anything else.
